OTHER INFORMATION

AVAILABILITY

Fibre1000 is limited to TPG or Pipe on-net buildings and your address must be pre-qualified before a quotation can be provided.

CONNECTION TIMEFRAMES

Typical installations take 6 to 8 weeks to complete. Timeframes can depend on building management approval and site access.

ETHERNET SPEEDS

Actual speeds you will receive will vary due to a number of factors such as your the network connecting the exchange, your equipment, software and internet traffic. Transmission overheads will also slightly reduce the speeds you will receive. Whilst we classify these speeds as being guaranteed, the above factors must be considered.

The 1000/1000Mbps speeds can be aggregated between up to four discrete products. E.g. one product can be allocated 200/200Mbps, a second can be allocated 100/100Mbps and a third can be allocated at 700/700Mbps - totalling 1000/1000Mbps per Fibre1000 service (additional charges apply - POA). Or use the entire 1000Mbps bandwidth for use with one Unlimited data service. Fibre1000 can be split up for use as an Unlimited Internet connection, or as a Private IP network connection.

EQUIPMENT

You will need to use a separate router to ensure the service is used with maximum efficiency. Contact us for recommendations and pricing options, or buy through your preferred supplier.

BILLING

We will bill you in advance for the minimum monthly charge and features. Your first bill will include charges for part of the month from when you took up your plan until the end of that billing cycle, as well as the minimum monthly charge in advance for the next billing cycle.
